UTTARANCHAL
UNIVERSITY

Lab Manual

Academic Session 2020-21 (Even Semester)

Student Name	:	Piyush Bhatt
University Roll Number	:	1901090008
Lab Name	:	Web Technology through PHP Lab
Lab Code	:	PCS - 404
Session Year	:	2020-21
Semester	:	4th
Course	:	(B.Tech-CSE)
Submitted to	:	Mr. Prashant Chaudhary

Department of Computer Science & Engineering
Uttaranchal Institute of Technology

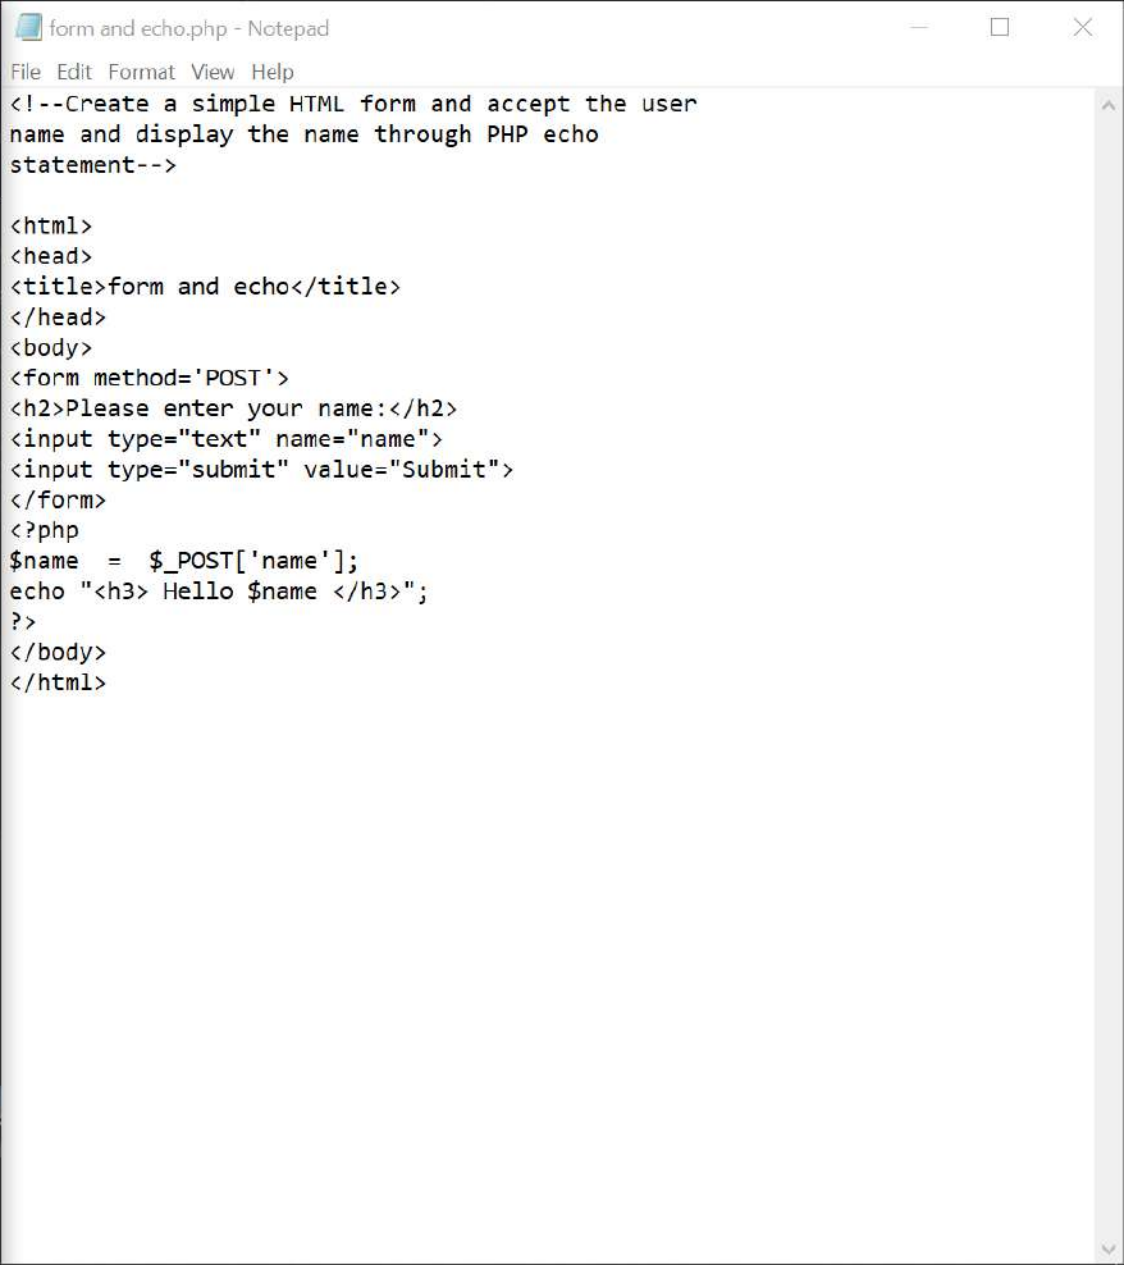

INDEX

S. No.	Title	Date	Page No.
1	Create a simple HTML form and accept the user name and display the name through PHP echo statement.		3
2	Write a Program to check and print whether a given number is even or odd.		4
3	Write a PHP script to find largest among three numbers		5
4	Write a Menu-Driven program to implement a calculator which performs only addition, subtraction, multiplication and division. The operation should happen based on the user choice		6
5	\$color = array [4 => 'white', 6 => 'green', 11=> 'red']; Write a PHP script to get the first element of the above array.		7
6	Create an associative array using the countries as keys, the cities as values and transform it into 2-dimensional array and display the data as a table		8
7	Create a login form with two text fields called “login” and “password”. When user enters “UUCSE” as a user name and “university” as a password. It should be redirected to a Welcome.HTML page or to Sorry.HTML in case of wrong username/password		9
8	Write a PHP code that define class Student with attributes RollNo, Name, Branch, and Year, create 3 instances of it, sets the values of each instance appropriately and print the values of all attributes.		10
9	Create a form with a text box asking to enter your favorite city with a submit button when the user enters the city and clicks the submit button another PHP page should be opened displaying “Welcome to the city”		11
10	Write a PHP program to store page views count in SESSION, to increment the count on each refresh, and to show the count on web page		12
11	Write a PHP program to store current date-time in a COOKIE and display the “Last visited on” date-time on the web page upon reopening of the same page.		13
12	Create a HTML form with Name, Address Line 1, Address Line 2, and E-mail text fields. On submitting, store the values in MySQL table. Retrieve and display the data based on Name.		14
13	Using PHP and MySQL, develop a program to accept book information viz. Accession number, title, authors, edition and publisher from a web page and store the information in a database and to search for a book with the title specified by the user and to display the search results with proper headings.		15-18
14	Create an HTML page with browse and submit to upload an image file. Write a PHP script to upload and display an image file.		19
